Subject: Have you filled in the Science forms & revised draft manuscript for short turn-around review

Hi co-authors,

Have you all completed the Author forms and License Agreement that Science sent you? Please do so soon if you have not. Please let me know one way or the other.

I have been communicating with the editor at Science, Dr. Jake Yeston – he is very hands on – and have edited the manuscript in an effort to comply with his thoughts. Several of Dr. Yeston’s thoughts are more important to him than others, including:

- 1) We are accepted as a report with a word limit of 2500 (we exceed this a little –hopefully forgivably);
- 2) he does not like the bioaccumulation discussion and wants it removed (it is gone);
- 3) he wants Figure 2 to be reoriented to portrait (this is in progress);
- 4) he wanted an improved description of the legacy fingerprint.

I understand Dr. Yeston’s position on all of these items. The improved description of the legacy fingerprint was a particular challenge but I realized that I had described it according to my sequential understanding, atmospheric degradation, followed by likely soil degradation or NOx degradation. Now the resulting prose is less circuitous I

hope. The largest part of these changes are on lines 188-212 when the manuscript is in Track-changes No-Markup mode.

Please let me know if you find an error in this new version. I plan to ask for an informal clearance review of the changes. Then I hope to resubmit soon.

Thanks,
John
